

OMV roll ST 8 is specifically developed for the cold rolling process of stainless steel and special steel. Based on high quality base stock oil with selected lubricity and EP additives.

Benefits

- Meets even the highest surface demands regarding strip surface quality and brightness (Bright annealed quality)
- Excellent lubrication properties
- Excellent air release properties
- Low oil consumption due to limited evaporating properties (narrow boiling range)
- Evaporates during the annealing process without any residues
- Excellent filterability
- Low maintenance effort required
- Reduce energy consumption

Technical data (typical values)

Property	Unit	OMV roll ST 8
Density/15 °C	kg/m ³	840 - 870
Viscosity/40°C	mm ² /s	7 - 8,5
Viscosity Index	---	100
Flashpoint	°C	>150
Air release, 50°C	min	4
Neutralisation number	mgKOH/g	0,1

Viscosity-temperature diagrams are available on request.

Safety, health, environment

A data sheet with safety and health information is available on www.omv.com.

Used lubricants and empty containers must be disposed of in accordance with legal regulations.

All data are average values and are subject to production-related fluctuations. Technical data are subject to change.
Please observe the instructions of the machine manufacturers!
