

EBOTEC BT 80

Metalworking

Formaldehyde free bactericide-fungicide for the treatment of aqueous fluids used in machining, rolling, drawing and wire drawing.

APPLICATIONS

- **EBOTEC BT 80** extends the working life of aqueous machining fluids thanks to its wide range of properties.
 - Proportions to be used for treatment purposes:
 - heavy contamination: 0.05%.
 - very heavy contamination: 0.2%.
- To be used only when contamination exceeds 10⁴ micro-organisms/ml.

ADVANTAGES

- Effective at low doses,
- Effective against all micro-organisms (bacteria, moulds and yeasts) that pollute aqueous fluids,
- This product contains no formaldehyde and is harmless for the skin,
- Enhances the rustproofing properties of fluids,
- Its partition coefficient ensures that both phases of the aqueous fluid are protected.

TYPICAL CHARACTERISTICS	METHODS	UNITS	EBOTEC BT 80
Appearance	Visual		Brown
Density at 20°C	DIN 51 757	g/cm ³	1108

The properties given in this table are typical values provided as an illustration.

HANDLING-PERSONAL PROTECTION

It is recalled that only authorised persons should handle this product and that gloves, goggles and protective clothing must be worn.
